

# Developer Manual

## How To configure in web application

1: Copy “protaxi” folder and paste into your domain

## 2: How to configure database

## 2.1 : import create new database in your cpanel

## 2.2 : import “database.sql” into you database

## How to configure database into PHP Database “/app/config/database.php”

The image shows a web browser window with the address bar displaying a local file path: `database.php - /run/gvfs/smb-share:server=192.168.1.158,share=share%20drive/backuptaxi/proxati/app/config - Geany`. The browser's tab bar shows three tabs: `details.txt`, `untitled`, and `database.php`. The `database.php` tab is active, showing the following PHP code:

```
42 | so make sure you have the driver for your particular database of
43 | choice installed on your machine before you begin development.
44 |
45 | */
46 |
47 | 'connections' => array(
48 |
49 |     'sqlite' => array(
50 |         'driver' => 'sqlite',
51 |         'database' => DIR_.'../database/production.sqlite',
52 |         'prefix' => '',
53 |     ),
54 |
55 |     'mysql' => array(
56 |         'driver' => 'mysql',
57 |         'host' => 'localhost',
58 |         'database' => 'test_proxati',
59 |         'username' => 'root',
60 |         'password' => 'root',
61 |         'charset' => 'utf8',
62 |         'collation' => 'utf8_unicode_ci',
63 |         'prefix' => '',
64 |     ),
65 |
66 |     'pgsql' => array(
67 |         'driver' => 'pgsql',
68 |         'host' => 'localhost',
69 |         'database' => 'db_taxi',
70 |         'username' => 'db_taxi',
71 |         'password' => 'taxi@123456',
72 |         'charset' => 'utf8',
73 |         'prefix' => '',
74 |         'schema' => 'public',
75 |     ),
76 |
77 |     'sqlsrv' => array(
78 |         'driver' => 'sqlsrv',
79 |         'server' => 'localhost',
80 |         'database' => 'test_proxati',
81 |         'username' => 'root',
82 |         'password' => 'root',
83 |         'charset' => 'utf8',
84 |         'collation' => 'utf8_unicode_ci',
85 |         'prefix' => ''
86 |     )
87 | )
```

The browser's right sidebar shows the 'Symbols' tab with the text 'No tags found'. The status bar at the bottom of the browser displays the following information: `line: 59 / 125 col: 34 sel: 0 INS TAB mode: Unix (LF) encoding: UTF-8 filetype: PHP scope: unknown`. The status bar also shows a warning message: `19:43:01: Failed to load one or more session files.`

update the mysql database details like username,password , dbname

SMS configuration, paypal configuration , app configuration are given in “app/config/app.php”

when you view then you will understand

3: change “app/storage” storage folder permission into 777

Now Access <http://domainname/folder/public> then you will find front end path

#### 4: Login into Admin panel

admin url: <http://domainname/folder/public/admin>

admin@instanttaxi.com/123456
