

APPLICATION MIGRATION MANUAL

Here are the steps to re-bundle your “Pro Taxi Client Android Application”

Step 1: Set up & Open ADT (Android Developer Tools)

- i. Download your latest Android tools such as ADT, SDK, IDE, JDK etc. from webOpen/Install all the tools required for Android application execution.
- ii. Set up your Android environment and Start your Android IDE(Eclipse/Studio)
- iii. Make separate the workspace for this Application (if possible)

Step 2: Import Pro-Taxi Client Project & its Libraries

- i. Click on File → Import.
- ii. Navigate to General → Existing Projects into Workspace.
- iii. Click on Browse in Select root directory.
- iv. Navigate to the folder where all the projects are stored.
- v. Select that folder and submit.
- vi. You will see your sources imported in Projects. Select All.
- vii. Click on **Finish** to finish importing.

Note: Each project should be attached to an Android SDK. To ensure that an Android SDK is attached;

- a) Right click on a project and select Properties.
- b) Go to Android and Select a Project Build Target of Android.
- c) Press **OK**.

Step 3: Adding Libraries for Pro-Taxi Client Project

- i. Right Click on your Pro-Taxi Client Project. Select Properties and go to Android. You will see the Library Section just below Project Build Target.
- ii. Click on **Add** beside Library Section and select any one from the Libraries listed.
- iii. Repeat steps i and ii to add all the libraries.
- iv. Once done; click on Apply, and close Properties by clicking on **OK**.
